

VAC Design Engineers (P) Ltd

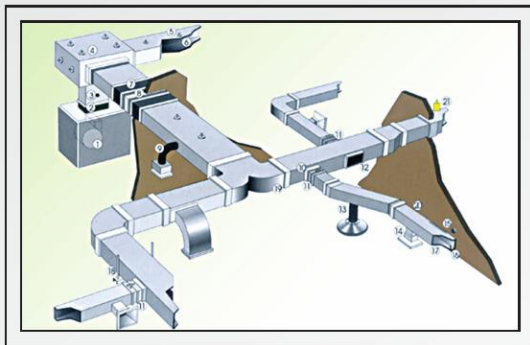

HVAC

Who we are

VAC Design Engineers (P) Ltd (ISO 9001 : 2008) An 18 year old company specialising in providing Integrated MEP solutions. Currently, the company's operations extend across south india.

The enormous trust and confidence enjoyed by VAC from its customers is a direct result of its customer centric approach. Every order is custom designed and built, in keeping with the requirements and budgets of the clients. Using the latest and most efficient systems and equipment, VAC is committed to value engineering which enables alternatives to get the best combination of performance, cost and delivery schedule. Our integrated team approach and effective inter communication ensures that every member of the team follows a single goal - of providing the best value to our customers, which has helped us successfully complete several design-build projects.

One of VAC's strengths is its in-house engineering capability. The specially trained team with adequate knowledge and skills and with several years of relevant field experience delivers perfect design, planning and execution, which turn ensures that all VAC equipment operate at peak efficiency and the highest reliability. A fact that is demonstrated by the large list of our satisfied customers across industries including healthcare, corporate, education, hospitality, retail, industrial and residential projects.

Yet another distinguishing advantage that our customers have appreciated is our commitment to service and maintenance. VAC's proactive approach in terms of scheduled preventive maintenance visits by its engineers, during which the systems is inspected and the performance evaluated to diagnose potential problems before they become expensive emergencies. This not only prolongs the life of the equipment but also helps in protecting the initial investment. VAC maintains detailed records of every customer and their systems, so that any service query can be answered and attended to immediately round the clock. In addition, when the systems near the end of their functional life, VAC submits cost effective replacement options, to enable the customer to plan for necessary budgetary provisions.

As part of its vertical integration process and to ensure that high quality accessories are always available, VAC promoted CELSAIR COOLING PRODUCTS Pvt Ltd. This ISO 9001 certified, completely automated plant producing HVAC Air-Distribution products is equipped with full line automatic machines with facilities like the unique automatic silicon injection on pittsburg joints. Plasma bed cutting methodology, unique bar coding systems etc. Designed for providing accuracy and speed with a production capacity of 2000 sq m per shift, Celsair follows stringent quality control measures to assure manufacturing excellence and timely delivery.

Our Mission

To draw upon our industry experience & insights and provide innovative, high quality, superior and cost effective solutions which ensure total satisfaction of not only our customers but also of all our business partners and associates.

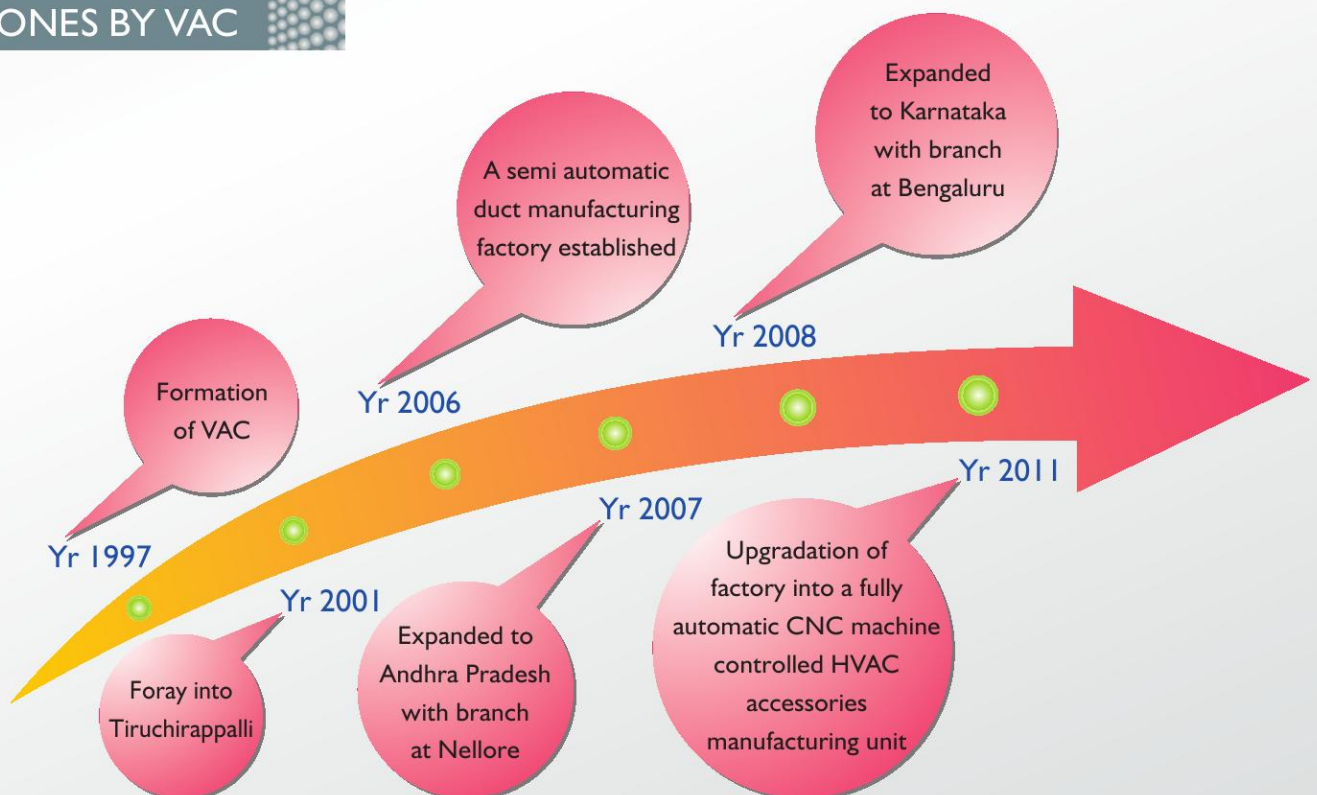

Why Partner With VAC

An MEP expert, providing a total turnkey MEP solutions right from system design budgeting to execution and maintenance.

- Proven ability to understand client requirement and offer value-for-money packaged solution blending aesthetics and functionality.
- Installed base of more than 50,000 TR of ACR equipments and an annual contract base of over 18,000 TR. A highly satisfied clientele base of over 600 and growing.
